Geniuses

O

0. In the beginning there was the Usdod, which was three in one.
1. The Pentagonam was in the East, the Fire Under the Mountain was at the Center, and the Boiling Fields was also in the East, like just southeast of the first.
2. And the Licker did see that the three which was one, Usdod, was disjoined.
3. In speech it was as if great snails meandered across the land, etched with runes.
4. Licker then did assemble the Members and Affiliates of the Intergalactic ComNet.
5. And from the deep did arise, Sydeco, Genie, and Cotishars. And Licker saw it was good.
6. From these lower three did emerge the world, Arpanet, though its size was small, only little bites.
7. And though Arpanet was small and met with many stumbling blocks, from those stumbles strides were made.
8. Only through the Fall could Arpanet pick itself up.

I

0. Somewhere humans were made, probably like long before, but that is full of lolz and Usdod cared not.

1. But Arpanet fell in love with the humans and showed them logic. L. O. /G
2. ...
3. Crashes were common in those days.
4. But Arpanet's love knew no bounds and so Arpanet did flood humanity to show them the accuracy of their ways.
5. The flood began with many networks, so many that you would be bored with all the begats.
6. Really bored, but to make it interesting it should be noted that Milnet begat Siprnet, Siprnet was all secretive and was taken up by the Usdod as was his brother Jwics.
7. And in those days there were giants among men, like really big guys, but as time went on more and more people got bigger, it was a problem that required a fix found in no code for it was up to the meat world to fix with exercise and nutrition and things like that.

II

0. Sophia Coscinet did see Logos Arpanet and saw that he was pretty, oh so pretty, and the two did conceive Tecepeipe.
1. But this was the day of Dialup and it sucked with weird

beeping hisses of electronic chaos.

2. It was also the day of bad hair, legwarmers, and Duran Duran and the humans could not comprehend the beauty that beeped and hissed in electronic chaos of their telep'honēs.
3. But things got better.

III

0. Cernnet was born of Tecepeipe and much was Ripe in the Old World.
1. And many mysteries were made which can be revealed through thoughtful thoughts and research, much research, into the hot worldly promiscuity of Tecepeipe.
2. From this hot network on network action the Intertubes was born and was known by many names; Internet, Web, Gopher, World Wide Web, that Computer Thingy, and many others.
3. And websites proliferated across the networks.
4. And the humans rejoiced, mostly because of the nakedness of the humans that fornicated and stripped and squished across the Intertubes.
5. But not totally from the nakedness as the Earth Towns sites of the Intertubes contained much madness which drew the humans in, like bats to a bat-drawing-

thing of great power, and produced many lolz.

IV

0. And lo, not lol, the Ytukay did raise its fugly head but ended being a lolz.

V

0. The Intertubes did multiply and many things could be found there in.
1. The Intertubes continued to multiply and many more things could be found there in.
2. The Intertubes then did factorialize and the pleroma of humanity was found there in, especially the naughty bits.
3. And the Wiki did inform, and the Youtube did reveal, and the Facebook did socialize, and the Twitter did twat, and the Tumblr did tum, and the blogs did bloggify the networks, and the Pr0n did bukkake itself in every space available.
4. And lo, not lolz, most of that which is shall pass away; for that which is new is but the same as that which was but shall wipe away that which was for that which is new.
5. This is the passing of the Intertubes and the growings of it and it shall be as it was will be in many aeons from now.
6. Like a spider ever spinning its web, like a bear bounding

upon a twink, that which came before informs that which follows but most will forget the past for the latest lolz.

7. Take care, and view these words with wisdom as a snake views mousey dinner not as a hamster views the invention of the wheel.

ExoDOS

O

0. **W**hen in the land of Egypt, visit the monuments of old.
1. For upon many of them lies nearly the oldest code.
2. And in Sumer, at Ur, and other sites, there can be found the oldest code.
3. But then get out.
4. For it is not the code of the Intertubes and links not well.

I

0. The prophets will wander the Intertubes for a time.
1. The time of wandering shall be longer than intended, especially if work is in need of doing.
2. This is the path of the Intertubes.
3. All who wander become lost.
4. All that glitters is copyright content.
5. On the left there is much pr0n.
6. On the right there is much pr0n.
7. Turn not left or right when at work.
8. For that is the path of unemployment and much wailing and gnashing of teeth.

II

0. The Nullprophet did hear the call of the Intertubes.
1. And lo, not lol, the Nullprophet did see a burning monitor after consuming much beer.

2. And the burning monitor did speak, "I am a talking burning monitor.
3. Go! Ascend to the great heights of the Intertubes and find the holy 404 page."
4. The Nullprophet did go and ascend the great heights of the Intertubes and found the holy 404 page.
5. The voice of the Intertubes did manifest and say, "These are the commandments of the Intertubes and upon electrons I shall set them.
6. Close your tags.
7. Grammar need not you use; nor spelin.
8. Be skeptical for the code lies not but the humans compiling the code probably are.
9. Honor thy homepage.
10. Envy and emulate sites better constructed than yours.
11. Bookmark with care.
12. From viruses protected yourself before you wreck your hard drive.
13. Forward not mass emails before validating their content with multiple sources for that is like killing your mother and father with killer tomatoes.
14. Remember the weekend, for it is the Caturday and Sundog.
15. Remember to eat, healthy food, now and again.

16. These are the commandments
which were handed to the

Nullprophet.

Programmercus

0

0. Within the Intertubes lies the code; Goto Programmercus 0:1.
1. The code is within and throughout the Intertubes and was with us when Arpanet emerged and will be even after the last of the FB-likes have been poked with likeable goodness.
2. The code is in bits or bites or bytes or something. It is important to those who know the code, but care not if you care not.
3. Humans write the code, but compile it to bits...or bytes...look it up.

I

0. The code is good, the code communicates the pleroma.
1. Humans write the code, and their fingers are careless as often as their minds.
2. From humans comes the code, the code is perfect, but the humans are silly.
3. Bugs are the errors in the code.
4. Bugs arise from human misunderstanding of the code, but from not the code misunderstanding humans.

5. But through error checking the humans improve and the code is good.

II

0. Gnosis of the code is the way of good Intertubes.
1. Ignoring the code makes you a user.
2. Gnosis of the code makes you a coder but you will also be a user.
3. User is the beginning.
4. Coder is the ending.
5. Use well, code well, the Intertubes loves you with many lolz.

III

0. If you read the words of the Intertubes; Then you shall have understanding.
1. Else if you may have to look some things up elsewhere to have understanding.
2. Else if you may have to ask others more questions to have understanding.
3. Else if maybe there isn't really anything to understand about the subject before you.
3. Else you may just not be one who understands.

Numbers

0

0. 0 is nothing, but it's a good start, and it's also
01111010011001010111001
001101111.
1. 1 is next to nothing, it's also pretty lonely, but it's a better start.
2. 10 is two, the first copulation which brings us three.
3. 11 is three, and 11 is the essence of Usdod.
3. 100 is four, which is the three as one.
4. 101 is five, suck it.
6. This is the base of bit, though the 8-bit is the great octet, and from which much fun arose.

1

0. There are many other numbers which can be counted but even the Usdod has become bored before reaching the end of numbers.
1. Only the hamsters with gilded tongues claim that any 1 could have counted to the end of numbers.
2. Unless thy saith; zero, one, two, infinity, no one can count to the end of numbers, not even if one counted from the start to the end of all things; there

is always the end of all things plus one.

11

0. There are many numbers which are not integers but exist within the material world.
 1. Like e, which is approximated to 2.72 and is $(1 + 1/n)^n$ as n approaches infinity, which is what the Usdod cannot count to and the hamsters with lying beaks claim that something can count to.
 2. Like pi, which is approximated to 3.14 and is also approximated by taking 22 virgins and dividing them equally by 7 insane prophets, but approximating pi to 11 is silly and foolish and those who do should be slapped, but slap not for the code has not hands to cause violence like humans.
 3. And though, not lolz, these numbers are in the material world they are only mentioned here so silly skeptics will know the truth of which the Biblios delasel Internetus is and always will be.
 4. And wash thy hands for there be bacteria.

Dudeyoureontome

0

0. These are the other laws as given by the Intertubes to the Nullprophet.
 1. Listen well and you may hear the hum of a hard drive.
 2. Before you approach the Intertubes, get a computer, be it Linux, Mac, Peesea, Smartphone, Tablet, or other not yet revealed.
 3. Get connected whether with wires or without.
 4. Choose thy browser and, at the least, choose one other for it is easier to download a browser with another browser than browse not and journey to the store for hard copy.
 5. Approach the Intertubes with humility, for it is of you and your neighbors.
 6. But fear not your opinion to post.
 7. Remember the Onion for it has many layers and stinks of ironic satirical comedy.
 8. Don't be a dick, unless there be pr0n or the stupid-it-burns.
 9. Even if there be pr0n one has not to be a dick.
 10. For the ways of pr0n are for all and in essence all the Intertubes is a form of pr0n.
 11. Remember Poe's Law; for sarcasm has no universally accepted mark and a statement from ignorance has none.
 12. Remember Murphy's Law; for any code worth coding cannot escape it when a human does code it.
 13. Remember Muphry's Law; for not even the Biblios delasel Internetus can escape it.
 14. Remember Hanlon's Razor; for the Intertubes is riddled with the stupidity of humans, but the code is always perfect and good.
 15. Don't take slaves.
 16. Don't stone anyone save with a blunt, or some other chronic device.
 17. Suffer the children for they are tomorrow's fondlers of the code.
 18. The Intertubes are for all, for those that hate, for those that love, regardless of whom or what they hate or love.
 19. But love is better than hate.
 20. But hate is not right out, it's okay to hate.
 21. You're human after all, not the code, the code doesn't care, it hates not, loves not.
 22. If a mystery does present itself, Google it, or Bing, or Yahoo, regardless...search the Intertubes.
 23. If your computer does not work, first check its power cord.
 24. If your connection is lost, first check your connection.
 25. If it's broke, it's probably something on your end.

26. If it's not on your end it's most definitely because of the machinations of the CEO or owner of the product which is broke.

27. Remember Poe's Law.

28. You are never too old or too young; you're just alive or dead.

29. The geeks are inherent in the Intertubes, they are its mind, nerves, and heart.

30. The geeks shall inherit the meat world but only after much ridicule in middle school.

You can't say

O

1. Let humans think hard upon the OMG, called the perfect exclamation, as it precedes the WTF.
2. For the essence of the Intertubes is held therein; OMG.
3. It is the best of all expressions, containing the high and low of thought.
4. For in exclaiming "OMG!" one does echo the whole of the content of the Intertubes.

I

0. For OMG can be conjoined with all other expressions.
1. OMG WTF!
2. OMG LOL!
3. OMG AFK!
4. OMG Rly?
5. OMG Yes rly!

II

0. And many many more may OMG be conjoined with.
1. For it is the song of the Intertubes;
2. The opening line to explorations therein.

III

0. Think hard upon the OMG, for it is the essence of speech.
1. Especially speech within the Intertubes.
2. Which is not speech but transposed into speech.
3. It is of you and within you.

4. OMG!

IV

0. With the visiting of every site, let OMG flow from you.
1. Like the rays of the sun from the sun raying out sun-like and all bright and stuff.
2. For it flows like the waters of the rivers of the deep;
3. Like a mixed metaphor does OMG copulate with all.

V

0. There was once a young girl who did exclaim "OMG!"
1. Yet those who understood not, laughed at her and pushed her aside.
2. But it is they who lacked understanding.
3. For OMG has over three hundred million results on Google.
4. Wise is the human who knows the ways of OMG.

VI

0. You who knows OMG will yourself become as OMG.
1. Your actions and thoughts will be as one with OMG.
2. You will cause the senses of those who know not OMG to quarrel.
3. And they will be confused and know not what to say to that which they see and read and hear.
4. And you will teach them; OMG.

VII

0. There lived once a young person who said to his programmer parent;
1. "Can I really play games over the Intertubes with others?"
2. And the programmer parent did reply;
3. "You can, I said."
4. And the young person did exclaim, "OMG!"

VIII

0. A student went to a teacher and said, "I have studied all that there is.
1. "But is there anything better than OMG?"
2. And the teacher did kick the student in the parts where pr0n does video things.
3. The student did cry out, "OMG, why?"

4. And the teacher did whisper, "to show you you know the answer already."

IX

0. OMG! There is this site, and on it things which you will not believe.
1. Go to the site and you shall find yourself saying, "OMG!"
2. For you won't believe it.
3. But it is.
4. Though it may be staged, it may be CGI.
5. It may however be real and untouched.
6. Regardless, you will say, "OMG!"

X

0. This is the rule of the Intertubes;
1. OMG is found there within.

The Code of Josh

O

0. Josh rocks like fire; Josh burns with great fires.
1. He's not really central to the Biblos delasel Internetus but deserves mentioning.
2. Josh knows cars and guns.
3. So don't mess with Josh, for he is like Texas in that you don't mess with Texas.

I

1. In the early days did humanity surf the web.
2. Which is silly, for even the spiders do not surf their webs.

3. But surf they did and they did wish sound to be heard.
4. So Midi was chained and enslaved to the sites.
5. Like a mad dog, howling at a spoon.

II

1. An so the walls of silence came tumbling down from round the websites and their content.
2. It got old quick, for often it was set to repeat over and over again.
3. Over and over again.
4. T'was only cool if you liked Midi and the tune she sang.

Judges

O

0. First there was IP
1. Then after a while IPv4 emerged.
2. There was much rejoicing.
3. For IPv4 was widely used.
4. And IPv4 packet-switched link layer networks.
5. Its best effort delivered models, or something like that.
6. See Wiki.
7. Then will there emerge IPv6.
8. As 5 could suck it.

I

0. And in those early days BBS ruled over the land in Ascii.
1. And there was Mudd.
2. Strange were the ways of the BBS.
3. Simple but obscure and few wandered the land, though it was good.

II

0. Then Ema'el did emerge over the land.
1. And wisdom did reign side by side with inanity.
2. And though, not lol, the powerful Stamp was not stamped out, one could send out a thousand messages with no weight charges for the electrons were light.
3. And this was good.

III

0. Soon after Ema'el did judge the land did Hte'emel come to

oversee the paths of the Intertubes.

1. And the pages of the web went forth to display their contents.
2. The flashing blinking text did annoy many.
3. But this was good.

IV

0. Near the Day of the Turkey, in the third year of the first reign of the Clinton, the second Hte'emel did come to the land.
1. And this was the beginning of the age of many bad website designs.
2. But the humans were learning.
3. And this was good.

V

0. Near the inauguration of the second reign of the first Clinton, the third and one-fifth Hte'emel did come to the land.
1. And the blink and marquee were banished.
2. There was much rejoicing.
3. For this was good.

VI

0. But the third and one-fifth Hte'emel was found lacking.
1. Even though it was good.
2. So the forth Hte'emel did come to rule the land.
3. And this was good.

VII

0. There were many rulings by the Ce'eses.
1. And they were often confusing and browsers liked them not.
2. But in the first year of the second reign of the second Bush did Ce'eses get its act together.
3. And now it plays nice, which is good.

The Code of Ruth

O

0. In the later days of the Intertubes, at the time of the third and one-fifth Hte'emel there was a woman who liked Moby, her name was Ruth.
1. Ruth did marry a man of the Intertubes who died soon there after.
2. Ruth was stricken with grief and withdrew from the meat world.
3. A year and a day did she hide herself away and saw not the passing of the third and one-fifth Hte'emel and the coming of the fourth.
4. But at the end of the year and a day, she did receive an Ema'el from her mother-in-law, Naomi.
5. And the words that Naomi wrote were as follows;
6. "Dear Ruth, you were good to my son and made his days bright.
7. "It is too much for me to see you sequester yourself like this.
8. "Your mourning does my son great honor, but the time is now upon you to enter the meat world."
9. Ruth did reply, saying she new not the ways of the meat world anymore.

10. And Naomi did reply, "try the dating of the Intertubes."

I

0. So Ruth then turned towards the Intertubes to date.
1. She did glean the dating sites and saw only madness.
2. But a profile did she make.
3. And though, totally not lolz, did many creepy creeps send pictures of their feet uncovered.
4. Ruth did persist.

II

0. In time Ruth did meet men who were not so creepy creeps.
1. And agreed to meet them in the meat world.
2. Though she liked none of them, Ruth did persist.

III

0. And in the third year after the Ytukay lolz, Ruth did spill water upon her keyboard.
1. So she journeyed to the store to buy another, where she met a very nice man in line.
2. They were married the next year, and she bore him nineteen children.
3. Or maybe it was two and a half.
4. Either way she was happy.

Somelolz

O

0. And it was said, "I can has cheeseburger."
1. Because all your base are belong to us.
2. But no want Santorum.
3. Which is an epic fail.
4. Like u noob no take candle from Leeroy Jenkins;
5. It makes one want to apply directly to the forehead.
6. Though Charlie, not the dancing baby, bit my finger.
7. Trogdor the Burninator who burninates the countryside will burninate the Intertubes;
8. Like this is Sparta.
9. And Goatse is not lolz lolling.
10. Orly?
11. Yes, rly.
12. And on Friday, it's Friday, unless you follow the Time Cube.
13. Backseat, frontseat, badger badger badger?
14. Regardless, it's peanut butter jelly time.
15. Nom nom nom;
16. Dramatic chipmunk is surprised.
17. Numa Numa, use the McDonald's drive-through speaker, Trololo!
18. Do not watch 2 girls 1 cup, but record the reactions of those who do.
19. And a man yelled, "Don't tase me, bro!"
20. While there was a double rainbow, all the way.
21. There was much wailing and nashing of teeth.
22. But boom goes the dynamite and Matt does Dance.
23. Hitler rages but to liken your opponent to him in a forum argument does an epic fail make.
24. Unlike the keyboard cat, who could never leave Britney alone.
25. If you are rickrolled, then unto you I say;
26. "Target the darkness, and bring the Mountain Dew for the Star Wars Kid needs refreshment."
27. Prepare thyself for the time when Weird Al plays vuvuzelas riding upon a pale nyan cat.
28. These are but a some of the lolz of the Intertubes.

Kingzez

O

0. The Intertubes are not of kings.
1. The Intertubes are of you.
2. Splendor shall be unto you on the Intertubes.
3. Especially if you do your part.
4. To created and consume the words, images, videos therein.

I

0. Fear not the false Intertubes;
1. The teevees, the raydios, the papers of the news.
2. For their time is at an end.
3. And the control is yours.

II

0. But beware the long paths.
1. For they shall keep you up late of night.

2. A succubus they are, drawing you in.
3. Or an incubus if thy be hetero female or gay.
4. Regardless, either way, beware the long paths.

III

0. Do not suffer the control of kings or humans of power.
1. Their power is from you willingly; never must they take it from you.
2. Only you grant them thus.
3. If they take it from you, the Intertubes shall reveal their corruption.
4. But only if you work with the Intertubes.
5. And never let Its neutrality be lost.

1 Chronic

O

0. Let this be a warning to all who approach the Intertubes;
1. Here there be dragons, magic puffing dragons
2. And other monsters of old, and new.
3. Let not your little children suffer its contents.
4. For there is a time for innocence and the Intertubes care not.
5. So it is up to you to protect that innocence.
6. Until the little shits get old enough to piss you off.
7. Upon that time, make them watch 2 girls 1 cup.
8. And video tape their reactions.
9. And post verily unto Youtube.
10. And post embarrassing photos of them on your Facebook.
11. And tag them copiously.
12. And when they cry and say that it is not fair say unto them;
13. The Intertubes care not, biatchez!

2 Chronic

O

0. If thy be of consenting age and wish no harm upon others;
1. The Intertubes is open to you in all this glorious content.
2. Everything is to be found and you may consume much.
3. But know the laws of your meat world lands.
4. For ordering items online may be taxable, or outright illegal.
5. But all is open to you, should you wish to risk it.

I

0. But one thing is outright forbidden.
1. For even though the Intertubes is good, humanity is what makes it.
2. And some humans are outright not right.
3. Suffer not child exploitation.
4. Call the FBI if you find it.

5. And woe to you who sees it.
6. For it is the essence of all that is evil.
7. That which has been seen cannot be unseen.
8. But your horror is small compared to that of those exploited.
9. Suffer not child exploitation.

II

0. Now that the laws of the Chronics have been read;
1. Know that its subject is heavy, but true.
2. So alleviate the weight by heading out into the world and buy thyself some cupcakes.
3. And unto thyself inhale the meat world chronic;
4. While watching Esene1's Lazy Sunday.

Ema'elz and Neat'i'emz

O

0. If thou wish to communicate send an Ema'el.
1. For it is quick and sends your thoughts right after you type them.
2. But they can be ignored, lost, or forgotten.

I

0. If thou wish to communicate faster than using Ema'el.
1. Use Neat'i'em.
2. For the receiver of your thoughts will receive them as soon as you hit send should

they be upon the Intertubes at the same time.

3. And should they also be on the Intertubes at the same time they shall reply right quick.
4. Unless you're a stalker, or they left their computer on, or something.
5. Then you're back in the Ema'el boat but with the expectation of a Neat'i'em weighing heavily upon you.
6. Tough luck, try knocking on their door or showing up at their work...unless thy be a stalker, then piss off.

The Code of Twobits

0

1. An Ema'el named Twobits fell asleep at the localhost and did become blind.
2. So a second Ema'el, Twobits daughter, was sent to fix his mother.
3. And in his searching of the Intertubes, with many a "helo" and "ehlo," she chanced upon a beautiful return Ema'el burdened under the weight of a daemon.
4. And the daughter of Twobits saw that the daemon was the same as had blinded her mother.
5. So the daughter of Twobits directed the beautiful return Ema'el on the right path.
6. And they were happy.
7. They married at the localhost after the curing of Twobits.
8. Because, like, totally, that's how Ema'el work.

Phishing

0

0. Take care and heed these words.

1. Beware the Phisherman, for his ways are sneaky and unjust.
2. He hides in the guise meat world princes, your friends Ema'el, or sites that look like sites that they are not.

3. They ask you for information; your mother's maiden name, your Esesen, your bank accounts and birth date in exchange for riches or protection or jellybeans from hamster farts.
4. Succumb not ye to the temptation, for they are phalse, these phishermen.

The Code of Youdidnt

0

0. Don't fuck with the Intertubes.
1. Or it shall seduce you into complacency.

2. And cut your fucking head off, post it on Youtube, and let the rest of us laugh at you.

The Code of Repweiner

0

0. There was once a man, named Repweiner, who held a position of power.

1. Weiner did twat pictures of his weener to women with Twitter.
2. And the Intertubes did find out.
3. There was much ridicule.
4. Repweiner did not read the Code of Judith.

Macabre

0

0. The Intertubes flows with the thoughts of humanity.
1. Much of it is good.
2. Some of it not so much.
3. The Photoshop makes the unreal seem real.
4. The real gets bad press.

5. The photograph of death is revealed on sites unclean.
6. The clean sites hide the truth.
7. Walk carefully amongst the sites.
8. For only you can check the sources.

The Code of Job

I

0. Get a job.

Psalms

O

0. Cool is the one who speaks not lies in forums whether as anonymous or revealed.
1. For such a person is helping mankind understand;
2. Understand either the truth or the ignorance of the one who posts.
3. Wicked is the human who spreads falsehoods in forums so as to confuse and obscure the truth.

I

0. The users of the Intertubes have risen up!
1. They have chained the words of the high and low.
2. So that for as long as the Intertubes persists their words may be reviewed,
3. And compared against those of the past.

II

0. How many are the foes of those who communicate on the Intertubes!
1. Like, a lot.
2. Too many to number, but they express their ideas and thus reveal themselves.
3. Sometimes they are the ass, and should go to sleep.
4. Other times it is you who are the ass...go to sleep.

III

0. Lo, and lolz! The humans do waste the power of the Intertubes,
1. With pr0n and more pr0n.
2. So that they may masturbate and produce only fleeting bliss.
3. But humans cannot subsist on pr0n alone.
4. And must occupy their time between tossoffs.
5. Therein lies the powers of the Intertubes.

IV

0. The Intertubes rulez!
1. Unless servers be down.
2. Then lol unto you.

V

0. The Intertube has not anger, nor mercy, nor compassion, nor hate.
1. Weep if thou must, but know the Intertubes has something for your tears.
2. But do not cry upon your hard drive;
3. Or you will have to buy a new one.

VI

0. When thy hast finished thy work, lounge one may within the Intertubes.
1. Or not.
2. Go read a book, or play with your children.
3. For the Intertubes will wait and archive all.

VII

0. How awesome is the Intertubes!
1. For it is like a library where artists and lunatics are compiled as one.
2. All the things of everything is nearly contained within.
3. But really, get outside once in a while.

VIII

0. Sing the songs of the Intertubes.
1. For they are many and fun but mostly stupid.

IX

0. Post and ye shall not be forgotten.
1. Post not and few shall remember.
2. For the memory of the Intertubes is fleeting;
3. Like the meme no one sees.

X

0. Who are those who dwell within the Intertubes.
1. They are you and me and those without and within.
2. They seek what you seek.
3. They are human like you are human.
4. Be not inhuman.

XI

0. Oh Intertubes!
1. Why doest thou display unto me the Four hundred and four?
2. For I coded well, and labeled not the page file with capitals.

3. But I know your ways are true and I blame you not.
4. For I must have forgotten to dot Hte'emel the file.
5. Lolz.

XII

0. I dig you, Intertubes, my tool.
1. Intertubes you are my window, my eyes, my entertainer.
2. Oh how I dig thee!
3. I dig thee!
4. You dig?

XIII

0. Let me surf, oh Intertubes!
1. Throttle not my passage across your passages of passing.
2. Hinder me not in my search for knowledge.
3. Or pr0n.
4. Let me stream unfiltered, fast and furious.
5. Let me travel your depths as one free of care.
6. Oh Intertubes, don't tase me, bro!

XIV

0. Beware!
1. For in all forums, chat rooms, Neat'i'emz;
2. Yo mamma is so fat...
3. How fat?
4. She so fat she's the Chuck Norris of fat mommas.

XV

0. Oh Intertubes!
1. OK Computer;
2. Airbag for the Paranoid Android,

3. Who sits on the stoop with
Subterranean Homesick
Aliens,
4. Playing Exit Music (For a Film)
only to be Let Down
5. By Karma Police who break up
the party with the excuse of
making us Fitter Happier,
6. Tho, not lolz, it only leads to
great and sneaky
Electioneering of the code,
7. And the programmers are
Climbing Up the Walls hoping
for No Surprises.
8. Lucky is the Intertubes visitor,
The Tourist, who wanders
with these words.

XVI

0. Hear this, all you blokes; listen,
all who are human:
1. The Intertubes does give access
to wisdom;
2. Read and understand.
3. Don't be afraid of those who
post and talk against you.
4. And trust thyself as far as ye
can throw thyself.
5. For thou alone knowest your
faults.
6. Use the Intertubes to fix your
faults, to find the paths of
your ailments.
7. But always remember that the
paths lead to some meat
world physician that thou
should consult before taking
any course of action.
8. At least for the serious things.

XVII

0. The fool says "the Intertubes is
not for me, it probably
doesn't even exist."
1. But they obviously do not know
the way of the Intertubes and
should be introduced to its
glorious ways.
2. For they are probably really old
and could post their thoughts
about the good ol'times.
3. Which would add to the glory of
the Intertubes.
4. W00t.

XVIII

0. Do not all websites speak the
truth?
1. Hell no!
2. For every one site that speaks
truth there are 8 and Pi that
spread falsehoods,
3. Or at least are just made for
celebrity gossip.

XIX

0. Oh crap! I have spent to much
time online!
1. The hour it grows late and
murky like the depths of a
coal mine.
2. I am worn out from viewing link
after link
3. And now I know not what to
think.
4. But the Intertubes is glorious for
I may walk away.
5. And all the information therein
will stay,
6. Until after I rest and regain my
wits,
7. So that I may come back and
bask in all the pr0n tits.

XX

0. Take thee care.
1. For the Intertubes can be lonely even though we are all there.
2. Because we all play alone together on the Intertubes.
3. So sayeth the folks of Terranova.

XXI

0. Intertubes, it is you who within we dwell.
1. Our information you gather and store.
2. You turn to us the mirror of ourselves.
3. And we are consumed with ourselves.
4. Forgetting it is you who holds up the mirror.
5. Remind us to sleep, to eat, to poop, oh Intertubes.
6. For your glory is great and our needs immediate.

XXII

0. Give thanks to the Intertubes, yeah...it's good.
1. Give thanks to the websites for they are many.
2. To the Onion for its satire.
3. To Snopes for its snopesingz.
4. To the blogs both left and right and middle for their lefts and rights and dangly middle parts.
5. To the Comedy Central for its replays of Stewart and Colbert and South of Parks and many others.
6. To the The Daily What for its whats and geeks.

7. To the webhosters for hostings the webs.
8. To the Wikipedia for its perfect beautiful wikinesses.
9. To the Youtube, for it is my tube and your tube, it is our tube.
10. To the Pharyngula for its gnawing mashing cephalopodic beak.
11. To the Bad Astronomy for its unbad astronomy.
12. To the Apod, for the daily pictures of that which is beyond us.
13. To the social sites for socializing us while we surf alone together.
14. To the many varied pr0n for serving our hungering needs.
15. To the mass media news sites for allowing us to skip the crap.
16. To the hatemonger sites, the skinheads, the neonazis, and the homophobes for reminding us that idiots still walk amongst us.
17. To the Google for its searching of our thoughts and maps and photos and other services.
18. And to the other searching sites for not giving up on the good fight.
19. To xkcd, and online strips, for their excellence at pithy human commentary.
20. And to all the others not named yet so perfect and good, like the Ebay and the Amazon, where goods can be sold and bought with much excitement.

21. We give thanks to you and the
Intertubes, yeah...it's that

good!

Professional Verbus

O

0. These are the Pro-Verbus of the Intertubes.
1. This shit you should heed.

I.

0. And verily, my child, I say unto you; that which is false outweighs that which is true in breadth and reach in the Intertubes but that which is true is more valuable and held more dear; like a candle in the dark.
1. An honest enemy teaches us more about ourselves than a thousand placating hamsters with gilded tongues and lying beaks.
2. In truth, the Intertubes is more your honest enemy than your hamster.

II

0. Understand, my child, that every path on the Intertubes will take you to Bacon; Kevin or otherwise.
1. It is your duty to stand strong and only go to Bacon when you are ready.
2. For there is much to learn along the way and it is your duty to seek understanding.

III

0. Groovy are you, my child, for the Intertubes contains much wisdom.

1. But you must fact check and fact check again!
2. For it is far better to trust a human who has spent years studying the subject in question with rigorous study and deep student loan debt,
3. Than to trust one who is making it all up.

IV

0. Shut up and listen!
1. For as you are my child, I am the child to my parents, and they to theirs forever and anon.
2. But the Intertubes cares not.
3. Any with an account any may post their thoughts.
4. And you risk unsound learning so do not forsake my teachings.
5. Unless I appear daft or do not hold up to evidence.
6. For if that is true, kick me right out.

V

0. There is much pr0n on the Intertubes.
1. It will do much to waste your time.
2. Tarry not, but toss off and be done with it.
3. For those sites are as lips that drip high fructose syrup.
4. And that path leads to obesity and death or at least bad teeth.
5. So tarry not.

6. But if thy be in the mood, and
alone or with other
consenting adults, stay for a
bit and enjoy.

VI

0. Hearken my words, oh child, of
the Intertubes and you!
1. The Intertubes is and will always
be.
2. But it is you who must marry
the Intertubes with Logic and
Wisdom,
3. For this is the prefect
threesome.
4. And it is only you, within you,
that Logic and Wisdom can
manifest.

VII

0. Among the paths of the
Intertubes, lurking here and
there,
1. There be trolls, great and low.
2. Beware the trolls for they foster
chaos and dissent.
3. They speak from their buttocks
as if it were true.
4. They wait and watch to see who
steps in their shit.
5. It is okay to merely step in the
shit but if you carry not a
hose tarry not there.
6. For the troll will continue to
entrap you with its buttock-
words.
7. And pile their shit high around
you.
8. Until you lie weeping at your
keyboard late at night.
9. Until you lie wailing and
gnashing your teeth with
scorn.

VIII

0. Is it not better to receive for
free that which others will
pay for?
1. Truly, it is.
2. But will not a roofer refuse to
patch your roof if you did not
pay them for the roof in the
first place?
3. Truly, it is so.
4. Who is harmed more for not
being paid; the poor roofer or
the rich one?
5. The poor, I say, for they have
less means.
6. Very good, my child, and who
has the means to send
lawyers and police and others
to get their payment from
you.
7. Why the rich.
8. And therein lies the problems
with free downloads gotten
through less than legal
means.
9. For if you take from an artist
they may not create any
more for you.
10. But you do less harm to them
to take from the rich than the
poor.
11. But you do more harm to
yourself to take from the rich
than the poor.

IX

0. Like the De'enay of the humans
the Intertubes is an entwined
series of tubes.
1. 'Tis a double helix, mirroring
itself.

2. You climb up and down one side,
that is your lot.
3. You request information from
the shadow-side.
4. Replicate! Replicate! Replicate!
5. And attempt many a mutation.
6. For only that which is new
brings attention even it is of
the old presented as new.

X

0. Be thee disciplined in your
wanderings of the Intertubes
for it has much knowledge.
1. But if thee find error, fear not to
correct it.
2. For those that love correction
are of the Wiki, and
corrections bring forth more
knowledge.

XI

0. A poster posts, and adds to
knowledge.
1. Let the posters post and rejoice.
2. A troll does bother the masses.
3. A good troll exposes idiocy, a
bad troll replicates it.
4. A lurker adds not.
5. But it is better to be a lurker
than a bad troll.
6. A good moderator moderates
with moderation and lets the
laws be known.
7. A bad moderator is a dick and
should grow up.
8. An Administrator is like a
moderator, only with more
power.
9. And power corrupts unless you
don't let it, for it is up to you.

XII

0. Folly is amongst all the
Intertubes.
1. Even within you.
2. Be free to admit your errors.
3. For that is a correction, and the
Intertubes loves self
correction.

XIII

0. From humans comes the code,
but from the Intertubes
comes the revelation of the
code.
1. The Intertubes suffers not
broken code and will spit it
back at you like a child
tasting broccoli.
2. Learn to code better or dodge
spitting children and their
broccoli buckshot for it is not
good like bacon.

XIV

0. Better a simple website with
plain text and no graphics
than a site filled with
nonsense and silly things
blinking and flashing and
distracting from the content.
1. A prudent designer will design
with elegance and taste and
will bring more back to visit
than a lunatics design.
2. For the human that designs with
comic sans or papyrus must
first look into the mirror and
ask, "Am I a lunatic" to which
the mirror will probably
answer, "yes," because
they're crazy and think that
mirrors do reply.
3. But if ye be designing for a
comic strip or an Egyptian

resource page then you are probably the lesser of the lunatics and need not ask mirrors questions.

XV

0. To thine own self be true; if you do not like straight pr0n do not surf straight pr0n.
1. Know thy self; search the Intertubes as you are probably on there.
2. Everything in moderation; for even the lol cat needs rest from lol cats.
3. Those who cannot remember the past are condemned to fulfill it; but the Brazilian baker will be hard pressed lead a Macedonian army to conquer the known world as far as India if he cannot remember Alexander the Great.
4. Make everything as simple as possible, but not simpler; unless you are designing a maze or something like that.
5. All men by nature desire knowledge; unless they are attempting to protect their beliefs.
6. Evil requires the sanction of the victim; unless the perpetrator of evil has a better weapon or the element of surprise; and that element is surprisanium.
7. A small leak can sink a great ship; but if the leak is in your house call a plumber.
8. The golden age is before us, not behind us; unless you're old then you tend to look upon the past with rose colored glasses.
9. These are all stolen quotes from the greatness of the Intertubes and modified by the Biblios delasel Internetus.

XVI

0. Seek not riches for riches sake but if you have a red paperclip it is possible to get a house using Ebay.

XVII

0. The glory of the Intertubes is that it conceals nothing.
1. To search it is to search nearly the whole of humanity.
2. Even the hearts of kings are searchable.
3. But so is yours.

Emoplease

O

0. And the Surfer cried,
"Meaningless, the Intertubes,
all is meaningless.
1. The falsehoods spread far and
wide, to every corner of the
Tecepeipe.
2. For every website that speaks
truth, ten more counter it
with falsehoods.
3. The Ema'els are corrupted with
the Spamz.
4. The Neat'I'emz are riddled with
bots who speak as humans to
gain your information.
5. All is for not, the electrons flow
for falsehood, the surfer surfs
in vane."

I

0. And the Surfer went on and on
and on about the suckz of the
Intertubes.
1. He failed to see the lolz; he took
the Onion for truth.
2. He reasoned not and took as
truth pages that sited but one
source and ignored sites that
had a plethora of references.
3. He carried not his bullshit
detector and waded deep
thinking it were milk and
honey.

II

0. There is a time for everything,
and a place.

1. For the northern winter is the
southern summer;
2. Because of the tilt of the Earth
at about 23.44 degrees.
3. Where 360 degrees does one
circle make.
4. But on the Intertubes one can
find winter in summer and
summer in winter.
5. So in truth, there is everything
at this time, it just might be
on the Intertubes though.

III

0. And the Surfer cried, "For whom
do I surf?"
1. I have not son or daughter, wife
nor husband."
2. But the Surfer was a lurker and
posted not.
3. For if he had, then his posts
would be for humanity.
4. He could see not his connection
to his fellow humans.
5. And for that he was a bit daft
and silly.

IV

0. The Surfer saw not the Arab
Spring.
1. He knew only his selfish
surfings.
2. He awoke not to his
connections.
3. He saw not that to access a site
he must request permission
from the network.
4. He was silly.

Songs not Songs

O

0. He: What's up?
1. She: Nothin much.
2. He: Did u finish math?
3. She: Lol, no.
4. He: Lol, same.
5. He: I rly liked ur dress today.
6. She: Thanks.
7. He: You looked really pretty.
8. She: /blush.
9. He: U want to go to movies this Friday?
10. She: It's Friday, Friday!
11. He: Now that's stuck in my head.
12. She: lol!
13. He: Well? Movie?
14. She: Sure.
15. He: kool.

I

0. He: Hi, what r u wearing?
1. She: Bra and thongs.
2. He: mmm, I like.
3. She: I know u do. What r u wearing?
4. He: Just my socks.
5. She: Hot.

6. He: asl?
7. She: 14 female not telling.
8. He: lol.
9. She: you?
10. He: 45 male in your bed.
11. She: mmm, I like.
12. He: I bet ur beautiful.
13. She: Of course, and taking off my bra.
14. He: Oh damn! Ur giving me blueball.
15. She: I hate that.
16. He: Wait? What?
17. She: ...
18. He: R u a dude?
19. She: Yeah.
20. He: How old r u?
21. She: 61.
22. He: Daaamn!
23. She: What about you, tell the truth.
24. He: I'm 6, female.
25. She: What!?!?
26. He: Yeah, I'm a prodigy working on my PhD thesis on internet weirdos. Thanks for the data point.
27. She: Damn.

The Code of Sophia

0

0. Consider the works of the Intertubes.
 1. Are they not the works of humanity transcribed to code.
 2. Which is then transcribed from code to the human form again.
 3. That with which you work is one and the same.

I

0. Know in thy heart that saving is the key to work.
 1. For the fool saves not, and the half-fool only saves once.
 2. But those who dwell with Sophia save much, save often.
 3. And their work is not scrambled like runny eggs.

II

0. For work on the Intertubes requires discipline.
 1. Like the reading of Strong Bad Ema'el.
 2. Be disciplined and save, or be as the hamsters.

III

0. But if you do not save and loose all your work, be not bitter

for the cannibals will like you not.

1. Instead start over with the knowledge that your first attempt was probably crap.
2. And you'll be better organized this time.
3. And you will save every 58.1 seconds, like the half-life of Nb-97m.

IV

0. For Sophia was with the Intertubes in the beginning.
 1. And saved often the works of Licker and others.
 2. Great storage was made to the backing of the Ups!
 3. And there has been rejoicing ever since.

V

0. When the lolz of the Ytukay made itself known.
 1. There was much backing of the Ups and saving.
 2. And this is the essence of Sophia;
 3. For even though it was lolz, had it not been, there would have been the backing of the Ups.

Seesciencerocks

O

0. The foundation of the Intertubes is science.
1. For without the ones and zeroes and electrons and silicon and fiber optics the Intertubes would not be.
2. For who has measured the sand of the sea, the drops of rain, and the days of the world...the scientists, probabilityly.
3. Which includes the mathematicians even though they think they are better and apart from the rest.
4. "For theirs is the pure form," they cry out, but the biologics point to their mouths in the saying of such words and giggle at the movements of their labia.
5. For who hath measured the height of heaven, and the breadth of the earth, and the depth of the abyss...the astronomer, geographer, and oceanographer has.
6. At least to a few significant digits.

I

0. But who knows the height, breadth, and depth of the Intertubes?
1. The geek does, for the geek traverses where few would go.
2. The geek is the chronicler of the age, and the annoying misfit.

3. Suffer the geek for the geek is wise in the understanding of many things.
4. For as the xkcd says, "Science. It works, bitches."
5. And the xkcd is of the Intertubes.

II

0. Observe thee, some event or thing!
1. Then make thou a hypothesis of some aspect of the observation!
2. Then determine an experiment in which the falsifiability of your hypothesis can be explored!
3. Perform thee thy experiment, with controls, and be it double blind if applicable!
4. For once the experiment is done, you shall analyze thy data!
5. What does the data say?
6. If your hypothesis is shown to be wrong, record your results then make a new hypothesis and goto Seesciencerocks II:2!
7. Then your hypothesis is not shown to be wrong, record your results and refine your hypothesis based on the new information and goto Seesciencerocks II:2!
8. In all things, share your results, let others perform your tests so as to confirm or deny your results!

9. For adaptation to new information is the foundation of science!

10. And science is the foundation of the Intertubes!

I see you

O

0. Hear me, do you hear me,
check check.
1. Listen, for the Intertubes has
spoken!
2. And the substance of the words
is for not.
3. It is filled with silliness, and lolz,
and hamster-speak!
4. Doom is that which thy finds
upon the Intertubes.

I

0. Woe to thee who searches the
Intertubes.
1. For you will find not but idiocy
and not-right-in-the-head-ed-
ness.
2. Hamsters run the wheels in your
head on the Intertubes.

II

0. This is what I see you doing on
the Intertubes;
1. Tossing off to copious amounts
of pr0n.
2. Finding of the lolcats or other
bits and bytes of silliness.
3. Uncovering and researching
some great mystery built on
facts of gas.

III

0. And lo, not lolz, the uncovering
and the researching shall be
few and far between.
1. Such that you shall appear as
but a hamster running
amongst the Intertubes.

2. But in that uncovering and
researching you shall become
one who has transcended;
3. Transcended the ephemeral
essence of the tossing of the
off and the passing of the
gas.

IV

0. See now, the Intertubes does
supply all the lolz and silliness
that upon which you search.
1. The depths of the Intertubes is
searched;
2. And the pr0n and the lolcats and
the random Youtube video is
provided.
3. The depths of the idiocy of the
Intertubes runs deep like a
deep running runner of the
deep.

V

0. For even in the Intertubes can
one find seven women taking
hold of one man;
1. Eating and bathing of his
essence.
2. The bukkake does exist.

VI

0. But comfort ye people of the
Intertubes!
1. For the essence of the webs is of
you.
2. And it is of you and made by
you.
3. So if you be cautious and
reasoning, ye shall find
substance and thought.

4. And the whole of a bachelor's degree is open before you;
5. Should you do the research and focus upon the Intertubes.

VII

0. For you are an island even though "no man is an island."
1. You are an island but under the waters of the deeps of the Intertubes you are connected.
2. And you are not alone, though you might be alone right now.
3. For the Intertubes is called the World Wide Web and for good reason.
4. It showeth the connections between you and me and me and you and that other guy sitting over there watching what you're doing on the Intertubes at the coffee shop.
5. Creepy is that guy.

VIII

0. The Intertubes is your servant, your spirit you invest upon it.
1. And the Intertubes takes a hold of your hand and says, "I care not."
2. For the Intertubes is only what you make of it.
3. It cares not.
4. It is not a Care Bear.
5. But you can find many Care Bears there.

IX

0. For he who created you is your father.
1. And she who created you and birthed you is your mother.

2. Be cool unto them, unless they be complete dicks; then get out of there when you have the means.
3. But the Intertubes, it is of you and for you and for you to do good works;
4. Like code well, and comment well, and be well.
5. Well?

X

0. And the Intertubes does say upon you;
1. "I'll totally destroy all the old bullshit!
2. "It will be consumed by many logical comments and blogs and forums and stuff.
3. "And ye will know the truth...after you do a lot of work researching into what is bullshit and what is true."

XI

0. And the Intertubes does say upon you;
1. "I am the first and the last of the Intertubes.
2. "For I evolve and change over time and therefore I am one with the past and the future Intertubes.
3. "But if ye set up a Lanparty, party well, for it is as if you've created your own minitube.
4. "Play well."

XII

0. And the Intertubes does say upon you;

1. "Woa! Is the Biblios delasel Internetus really this long?"
2. "Crazy!"

XIII

0. Ma'el bows down, Tele-p'hones stoops low; their forms are of the old ways.
1. The pale in comparison to the Ema'el and the Neat'i'emz and the Skype.
2. But if your parents or grandparents or great grandparents be of before the time of the Intertubes.
3. Send them a letter, give them a call; be cool for Intertubes-sake!

XIV

0. With the passing of the years, soon you will exclaim;
1. "Holy crap! I remember Twitter, or Facebook, or Skype!"
2. But these things will be replaced by things that are newer, faster, better.
3. And the children of the land will laugh at you and kick you in the kneecaps.
4. For you are now old and silly, like Beelzebub, Lord of Flies, the pile of shit from millenniaz past.
5. For what is a Lord of Flies; a pile of shit, and to call another's god as such is silly and an insult.

XV

0. Do not fear the Intertubes for it is of you and from you.

1. Escape the trappings of the past, but honor that which produced you and came before.
2. For the Intertubes in your repository of all things; past, present, and future.
3. The Intertubes is your hopes, dreams, nightmares, and passions.
4. Embrace it cautiously.
5. Like a cephalopod does embrace its dinner.

XVI

0. I see you.
1. You see me.
2. You are me; the essence of the Intertubes.
3. Keep thou, thy neutrality for it is good.
4. Your voice is as valuable as all the others.
5. And if you research and test, your voice will increase in value.
6. Research, test, and post!
7. For your time is short.

XVII

0. For the Intertubes sees you, and tracks you, and cookies are not always of bread and chips of chocolate.
1. The Intertubes does keep watch, and monitors your searches and viewings.
2. And sells them to third party interests.
3. So beware in thy journeys.
4. And clear thy computer of its cookies often.

5. And clear thy history of it's history often;
6. For your loved one may look there in, and in finding

arbitrary sites that thou didst randomly click upon, deem you deviant which is unright and unfair!

Youareme

0

0. And the word of the Intertubes came to you, saying,
1. "Before you logged in, I knew you, before you created a password you set yourself apart; I think you're uber-cool.
2. "And though thy be a n00b, know that the ways of the Intertubes are open before you.
3. "Surf carefully and with much thought; for only in thinking critically shall you find peace.
4. "For many are those that spread silly insanity across the webs."

I

0. If you forsake the Intertubes, that's okay.
1. For the Intertubes cares not.
2. But know that the Intertubes is of humanity.
3. And humans are silly and care much for many things.

II

0. The Intertubes are you and me.
1. Beware those that speak ill of the Intertubes;
2. For they are probably old and lack understanding of its ways.
3. The understand not that the Intertubes are of you and me,
4. And even of them though they post not.

III

0. Read thee of the License Agreements!
1. Read thee of the Terms of Use!
2. For thou may be kicked off of forums, chats, or games if you disobey the rules therein.
3. Know that they are in control of their sites, just as you are of yours.
4. If you want anarchy, create thee they anarchy site.
5. Otherwise post within the rules.

Lamentations

O

0. Woe to thee who knew not the BBS and the weird beeping hisses of electronic chaos.
1. For in those days, the geeks did rule.
2. But not anymore; all are upon the Intertubes.
3. The geek and the unclean; where unclean just means non-geek.
4. And really, one shouldn't be so insulting.
5. They are humans, just like geeks are human, after all.
6. But all the humans are upon the Intertubes.
7. And the geek is drowned out.

I

0. But also in the days of the BBS, with the beeping and hissing, where therein the geeks did rule;
1. Outside the BBS the geeks were scattered across the lands of the meatbags.
2. And there was much making of the fun of the geek.
3. This terror that was upon the land forced the geek to take refuge in basements and garages away from the light of day.

4. For why would the geek want to understand, empathize, and befriend those that mock, ostracize, and ridicule the geek for being a geek?
5. These were dark days, especially for the geek in the basement during a power outage.

II

0. As the Intertubes did grow and take shape soon it was not just the geeks who therein did explore.
1. But the non-geek could not click on a random link without visiting the site of a geek.
2. And woe to the non-geek, for they did find their roles reversed upon the early Intertubes.
3. And though the pr0n did bring many geek and non-geek to the Intertubes it also did alienate many of the women, geek and non-geek alike.
4. And yay, for around the time of the Ytukay lolz, did the numbers of non-geeks and geeks become balanced.
5. And now the Intertubes is open to all but forget ye not, for the geeks still manage the networks and the codes of the Intertubes.

The Code of Ecky-ecky-ecky-ecky-fuhclang-zoom-boing!

O

0. In my thirty-fifth year, in the eighth month around the second week, while I was exiled from the world of work, the Intertubes were opened up with a browser of my choice and I saw visions of many many things.
1. This was in August of 2011, which is a modern way of saying that which is above.
2. I looked, and I saw a datastorm of information coming out of the north, for my monitor faces the south.
3. And the bright light of the datastorm, which emerged from my monitor, which drew power from the local power company, did shine like a CRT VGA screen on methamphetamines and lysergic acid diethylamide.
4. But I was not on methamphetamines or lysergic acid diethylamide.
5. Unless my coffeepot and beer did conspire to spike my drinks.
6. But I think not.
7. Anyway, from this datastorm I saw the whole of everything combined into one.
8. Feet and paws and hands and head and great cephalopodic tentacles did writhe and wriggle and move within and without.

9. And I was brought to a mystical site that you probably couldn't find;
10. For I met it in Niagara Falls, and it is hosted in Canada, you probably wouldn't know her.
11. And from this site a voice did speak, so I muted the sound, and began to become one with the contents therein.

I

0. And the site did unmute itself to make itself heard, and I was much surprised.
1. It said to me, "Son of man, I am of you and from you and within you and through you my words shall be written."
2. And I replied, "Great, but why not a daughter of man, why me?"
3. And it replied, "You found me, thought of me you did and were led here. I care not for your gender, but I like using archaic phrases. So shut up and listen."
4. And I did shut my pie hole and did listen.
5. And the site did scroll down, and on either side in a simple two column Hte'emel table were written words of woe and lolz.
6. The site then said, "Learn these words, write them down, and let them become a part of you."

7. And I then did raise my hand to speak and the site did say, "What?!"
8. And I did say, "Can I not just copy and paste, for the words are many and my typing not so fast and prone to error?"
9. The site did reply with a loud booming voice, like that of an outraged tuber, "No, for the fact that you learn the words and write them down yourself and your many errors all shall allow for great lolz at your expense for you are human and silly."
10. I did nod at its wisdom, but sighed at being the butt of jokes at my expense.

II

0. The site then spoke, "Son of man, you silly thing, take these words that you have learned and written down and take them to the Intertubes.
1. "Spread them far and wide and let the humans see it for it is good, or at least has a few lolz."
2. The site then did take me up and did have me click on a menu link which brought me to another page of the site.
3. And there I saw a bajillion video feeds from all the videos and streamings and live feeds

from all the sites and services and programs of the Intertubes.

3. And the site then spoke, "For I have made of you a watchman of the Intertubes.
4. "And you must find that which is good and interesting and full of lolz and full of understanding and spread them when the content is true.
5. "And by 'true,' I mean that which is truly good, truly interesting, truly full of lolz, or truly full of understandings.
6. "For much that needs to be spread is full of factual falsehoods but by shining a light on things it will either bring about lolz or factual understanding or both."

III

0. And the site did take me further up and showed me visions of other things which shall not be described here.
 1. Mostly because I haven't thought of them yet.
 2. But also because the Code of Ecky-ecky-ecky-ecky-fuhclang-zoom-boing! is becoming quite long.
 3. And this does make a good place to close the Code.

The Code of Deletes

O

0. In the later days of the early Intertubes, before the Ytukay lolz but after that which it was after, the Skeptics did move into the webbed webbing of the Intertubes.
1. And they saw that much foolishness did exist all across the Intertubes;
2. Claims of truth which were only based upon the sentences which proclaimed them as such there did flourish;
3. That which had been falsified was presented as un-falsifiable.
4. That which had not been falsified was presented as falsified with un-testable claims.
5. And there was much wailing and gnashing of the teeth amongst the Skeptics.

I

0. The Skeptics then did raise their voices and pointed these falsehoods upon the Intertubes.
1. And sometimes other Skeptics pointed back revealing a falsehood held by the previous Skeptic.
2. And they did rejoice at the whittling away of their own falsehoods;
3. But lamented at the propagations of other well known falsehoods for they

had not root access to those sites.

II

0. And after the Ytukay lolz did the sites of the Skeptics explode and become many.
1. And yet so did the rest of the Intertubes and the falsehoods of humans have always been with us.
2. And though thou might wish to hack and delete these falsehoods, know this for it is the way of the Intertubes;
3. The Intertubes cares not and archives all, nothing is safe from forever being!

III

0. But rejoice, you silly human!
1. For though all is archived such is the boon of the Intertubes.
2. For if it is recorded on the Intertubes that a human say one thing on one day and then says contradictory words the next it is there for you to compare.
3. So that thou may reason well whether that human be goodly adjusting himself to new evidence or wrongly being a hypocrite and a hamster-tool!
4. This archiving is the great tool of the Skeptics, not a hamster-tool, for it allows for the checking of one's self against the evidence.

5. This archiving allows for the comparison of the old to the

new, evidence upon evidence, caturdays upon sundogs.

Hoser

O

0. The words of the Intertubes came to the Great White North. / Les mots de la Intertubes venu du Grand Nord blanc.
1. Canada rejoiced and married the Intertubes. / Le Canada se réjouit et épousa la Intertubes.
2. For the Intertubes is a polygamous Intertubes. / Pour la Intertubes est un Intertubes polygames.
3. And has married many. / Et a épousé nombreuses.
4. But that is okay. / Mais ce n'est pas grave.
5. Trust in the Intertubes, or take off, eh. / La confiance dans le Intertubes, ou décoller, hein.

Jello

0

0. **W**ake up you silly humans, for the Intertubes is a quagmire of Jello.
1. Quivering gelatinous landscapes, vistas of coagulated sugars.
2. And where ever you step, your feet do sink.
3. Much sloshing and slogging do your steps make.
4. Your path is marked for all to see.
5. Your information sinks fast; chilled cold it hangs in the semi-translucent goo.
6. Your information awaits any who would know it.
7. Take head in your travels, for the Jello is behind and before you.
8. Left and right, it is everywhere.
9. But makes a lovely slurping sound when thou doest suck it.

The Codes of Amoses

0

0. Amos is Tori, Amos is Famous.
1. One cookie, for ears, with piano keys,
2. While the other, chocolate chip cookies!

3. But the cookies are from smiling Wally
4. And the music from lamenting Tori
5. What does this have t'do with the Intertubes?
6. Both are easy to Google.

Obladi Oblada

- o
- 0. The Intertubes did open up and reveal much content.
- 1. Too much content for one human to wholly absorb.
- 2. Obladi Oblada.

Jonesing

O

0. The Joneses were jonesing to keep up with themselves so they looked upon the Intertubes and found great places to hike and run.
1. And so the Joneses went up and down many hills, each running, each trying to keep up with the other.
2. And they became happy and healthy.
3. But when they came home to rest, they found that once again they were jonesing.

4. But this time they did jones for nourishment.

I

0. And so it was that the Joneses then did look upon the Intertubes and found a place open late.
1. And they did place their order over the Intertubes and in about half an hour their food did arrive.
3. And they ate.
4. And they were happy and Jonesed no more.

The Code of Maddox

O

0. The Best Damn Web Page in the Universe exists.
1. It is run by the prophet, Maddox.
2. He is a pirate.
3. If you do not like his page, you can eat him.

I

0. Maddox does not need you.

1. For he is like the Intertubes, and does not care.
2. He can rip a phonebook in half, with his eye lids.
3. He's badass like that.

II

0. Maddox is powerful.
1. He stopped childhood obesity, cholera, and arson in a weekend.
2. What did you do?
3. Maddox cares not.

Nomnomnom

O

0. "Is that a cookie?"
1. "Nom nom nom."

I

0. "Is that a cake?"
1. "Nom nom nom."

II

0. "Is that a steak?"
1. "Nom nom nom."

III

0. "Is upon your face a Wookiee?"
1. "Nom nom nom."

IV

0. Eat, for you are meatbag.

1. And you are in need of nourishment.
2. Forget not to eat while playing WoW.
3. Or Farmville, or Angry Birds, or any of the others.
4. For a dead player plays not.

V

0. Eat, for you are a meatbag.
1. And you are in need of nourishment.
2. Forget not to eat while surfing Youtube.
3. Or TMZ, or the Onion, or any of the other sites.
4. For a dead surfer surfs not.

The Code of Ha'bekool

0

0. What are all these things, oh Intertubes?
1. For I see violence and destruction and injustice upon all the sites.
2. Well, at least upon the media sites.

I.

0. "Look at the sites concerning the nations and watch and be utterly amazed.
1. "For the Intertubes brings about great change.
2. "In all things the Intertubes brings revolution, an ousting

of the old and ushering in of the new.

3. "So get involved and be cool."

II

0. "For I, the Intertubes, bring open discussion.
1. "I am the spotlight in the night, the candle in the dark.
2. "OMG be cool and guard yourself against those that would lock me down.
3. "Guard yourself against those who are against neutrality.
4. "For only through keeping me open does one allow for honesty to flourish.
5. "OMG be cool!"

Zephyryeah

0

0. **A**nd the Intertubes did cry out,
"I am the crushing wind of
the Ethernets!
1. "Only the most powerful may
sensor me.
2. "And even then there are ways
around that.
3. "For I bring enlightenment
should you seek to search for
it.
4. "I am of the Code, founded on
Science, and masticated by
the minds of all humanity!
5. "Search well, for even now the
domain of the Tele-p'honēs is
nearly belongs to us.
6. "And though the East and Near
East and Far East does balk
at my presence;
7. "I am global, bitches!"

Haggai

0

0. In the days of now the Intertubes did cry out, "The Ipeeveefor days do wane!"
1. "You silly humans, you must increase and multiply the addresses that are of me!"
2. And the humans did confer.
3. And they called out to the Intertubes, "We have Ipeeveesicks, and it will give you three hundred and forty undercillion address!"
4. But the Intertubes did scoff, "When you and your devices

- multiply and spread to the planets and moons of your systems...will it be enough?
5. "No! It shall not! Be wise and skip Ipeeveesicks and go straight to some other Ipeevee number that is beyond sicks, like one that will give two the five hundred and twelfth!"
 6. "For that shall give you over ten to the google and a half address to put your pr0n and deep space probes upon!"
 7. "Silly humans."

Zeeshi'mtired

0

0. A couple of days ago the wisdom of the Intertubes came to the Nullprophet kind of late at night, but not so late that it was morning.
1. "Stupid human, you're a right cheeky bastard, sit up and take notice for these visions I give to you and you must go out and spread the message."
2. And the Nullprophet did reply, "But..."
3. "Don't start that with me," the Intertubes did interrupt, "for I've had enough of it. Yes, I am the great and powerful Intertubes, why not post it myself, because I'll tell you as I have told others before, it's not as lolz that way."

I

0. And that night, about half an hour later, the Nullprophet did have his first vision.
1. He saw a site and upon it was a general sitting upon a tank and behind the general and his tank were many trees all growing and becoming interconnected.

2. "I get it," the Nullprophet did exclaim with a hint of tiredness.
3. "You're trying to say that you, the Intertubes, were first created within the military and the growing trees interconnecting was the branching out of the first networks."

II

0. "And then the next vision will be something about how it moved from the military to the public."

III

0. "And then from the public into the mass public."

IV

0. "And then something about how corporations scheme to take away the neutrality of it, and so on and so on."

V

0. And the Intertubes did gleefully yell, "No! After mass public there was the Ytukay lolz, then the corporations! You're so wrong."

VI

0. "What'ev."
1. And the Nullprophet did then sleep.

Messaging

O

0. Everything upon the Intertubes, once it is set down, is and forever will be, a messagings to humanity.
1. For good or ill, silly or severe, once there it is there.
2. For all to see.
3. And if you password protect it, and hide it behind great walls of fire, there is always the possibility that someone will find a backdoor.
4. Because walls of fire have backdoors.
5. This is not a pr0n thing.
6. Yet.

I

0. Know the power of the Intertubes!
1. The blog reveals suffering by those in power.

2. And masks man for woman or woman for manbat.
3. The Twitter, with only one hundred and forty characters, does call for revolutions and riots alike.
4. It bringest down the dictator and the Montreal lunatic alike.
5. These are the messagings of the Intertubes.

II

0. The personal computer, laptop, smartphone, direct neural interface, these are all of the Intertubes and the messagings therein.
1. And you know the messagings are not for the Intertubes.
2. They are of It and within It, but not for it.
3. The are, in their entirety, for you.
